Re: Dr. Shankar Mohan

It gives me great pleasure to write this testimonial for Dr. Shankar Mohan, whom I have known very well as a postgraduate resident in my firm for the past three years. As a Resident he has had a wide exposure in all aspects of oral & maxillofacial surgery. He has had the opportunity to assist in both major & minor oral & maxillofacial surgery.

Dr Shankar has been a consistent good performer in his postgraduate exams, being always in the top three of the class. His clinical skills match his sound understanding of the fundamentals of dentistry. This young man has rich potentials which have blossomed forth in ever so many realms. With a good command over written & spoken English, he could tackle any situation. His lovable attributes has made him popular with his teachers, colleagues & patients. Full of drive & initiative, he has always shown a willingness to shoulder responsibilities.

Dr Shankar has passed the primary FDSRCS examination in the very first attempt and this certainly speaks for his in depth understanding of the basic sciences. He possesses the acumen to become a specialist and I am sure he will be an asset in any department. I have no hesitation in supporting and recommending his application for a position in a maxillofacial unit in the UK. I wish him the very best of everything.

Dr Shankar Mohan is not related to me.
